

BusinessObjects Enterprise XI 3.0 Administration

(formerly titled Business Objects Enterprise – Administering Users and Content with the CMC)

This two-day instructor-led course explains how to perform the tasks in the central management console (CMC). These tasks involve supporting BusinessObjects TM Enterprise users and groups so they can access corporate data through the web portal in BusinessObjects Enterprise. This corporate data can take the form of Crystal Reports, BusinessObjects Web Intelligence, or Desktop Intelligence documents, Voyager reports, program objects, object packages, and popular third-party objects, such as Microsoft Word and Excel files, among others. Please note: this course does not discuss maintaining BusinessObjects Enterprise servers, which is taught in the BusinessObjects Enterprise XI 3.0: Administering Servers – Windows course. The business benefit of this course is that it provides a foundation for System Architects/Administrators to effectively manage both users and content on the BusinessObjects Enterprise platform.

Who should attend?

The target audience for this course is System Administrators who are new to BusinessObjects Enterprise and will be responsible for maintaining BusinessObjects Enterprise users, groups, and objects in their organization.

After completing the course, learners will be able to:

- Understand the BusinessObjects Enterprise interface and architecture
- Manage BusinessObjects Enterprise Content
- Secure BusinessObjects Enterprise Content
- Secure Applications
- Publish and configure content
- Schedule reports and objects
- Understand Federation

Prerequisites

To be successful, learners who attend this course must have working knowledge of NT enterprise security concepts (global & local groups, and directory structure), Crystal Reports and core report design concepts

Materials Provided

BusinessObjects certified course manual
