

## BusinessObjects Web Intelligence 3.0: Advanced Report Design

BusinessObjects Web Intelligence™ is a query, reporting and analysis tool that allows you to access the data in your corporate databases directly from within BusinessObjects Enterprise™ InfoView and to present and analyze this information in a Web Intelligence document. This one-day instructor-led classroom course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents. After completing this course, you will be able to create combined queries and use sub-queries. You will also be able to use character and date string functions, create variables using "If" logic, and redefine calculation contexts. The course also provides an optional appendix describing how to link Web Intelligence documents using the OpenDocument URL command.

### Who should attend?

The target audience for this course is business users who need to access and analyze corporate information using InfoView and Web Intelligence.

### After completing the course, learners will be able to:

- Utilize Advanced Query Techniques
- Use Character and Date String Functions
- Understand and Manipulate Calculation Contexts
- Use If Logic
- Implement Advanced Reporting Techniques
- Link to Documents

### Prerequisites

QA210V3.0 BusinessObjects WebIntelligence 3.0 Reporting course or equivalent experience
