

## BusinessObjects Xcelsius 2008 Enterprise: Core & Connectivity

This three-day instructor-led course is designed to provide you with an understanding of how to create interactive visualizations based on Microsoft Excel workbooks using BusinessObjects™ Xcelsius Enterprise 2008. A series of interactive content, demonstrations, examples and review quizzes will help you better understand how to use Xcelsius. The business benefit of this course is that users with data in Microsoft Excel workbooks will be able to quickly create visualizations and dashboards with minimal effort. The business benefit of this course is that you will be able to create models that can act as dashboards, scorecards, and live reports for a full range of interactivity and maximum benefit.

### Who should attend?

The target audience for this course is the technical user who will connect existing models to live data sources.

### After completing the course, learners will be able to:

- Understand Crystal Xcelcius interactive models
- Create a Model
- Format a Model
- Add interactivity to a Model
- Create a connected Model

### Prerequisites
